K-Tech

The New Generation Smart Cylinder System

Mobile Application

You can download "Kale Mobil" application for iPhone and Android smart phones free. Language features of the application are available. It can be supported in IOS 13 and above software.

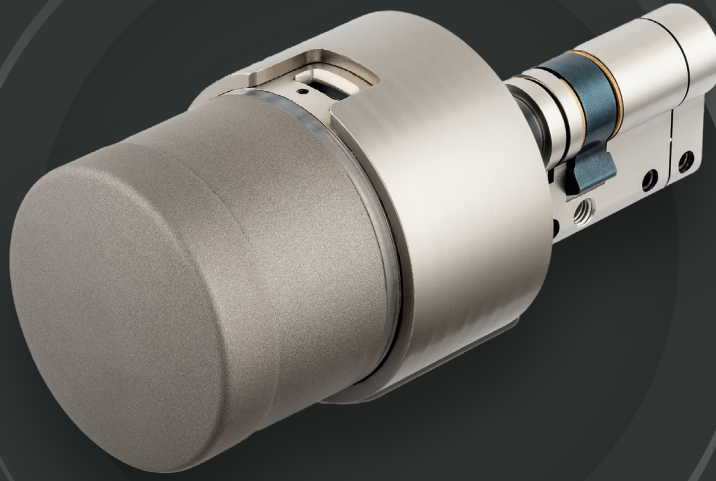

Remote Control

It offers comfortable experience thanks to its remotely controlled locking and unlocking feature. Preferred optionally, Kale remote controls can allow you to control your door from wherever you sit.

Fingerprint System

Maximize your security by integrating it with Kale Fingerprint Reader. The fingerprint control feature which can be added optionally facilitates both top security and also ease of use.

Voice Command

It offers a voice command feature with 'SIRI' in IOS-based phones with which you can use your voice as your key.

Steel Reinforced and Trapped Cylinder Precautions

Cylinders that provide an extra security that, during attempts of theft, only the front component is broken, thanks to its steel reinforcement with a trap, thus rendering further attempts of intrusion impossible.

Battery Charging with Type-C Cable

Its average lifetime of 3 months as well as its rechargeability allows an extended use without changing batteries.

Battery Life
(10 Unlocks/Locks per Day)
3 Months / 90 Days

Easy Installation Wizard

You can adjust locking direction, number of locking cycles, automatic locking and knob lock.
